1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 5-6, are rejected under 35 U.S.C 102(b) as being anticipated by Samarughi et al. (US PAT: 5,999,229, hereinafter Samarughi).

Regarding claim 5, Samarughi discloses a digital sound television system comprising: a television set including a CRT (fig. 2) for displaying television picture, a microprocessor unit (8, fig. 2) for controlling receiving and displaying of the television picture in response to a user's command, processing means for processing sound signal, and CRT scanning means (implicit as the reference discloses CRT for displaying TV pictures) including horizontal scanning means, wherein, the sound signal alone is processed when the television picture displayed by the CRT is shut down (col. 3 lines 12-29).

Regarding claim 6, Samarughi further teaches the following: comprising a switch (11, fig. 2) for shutting down the television picture down (fig. 2, col. 4 lines 34-36).

3. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
